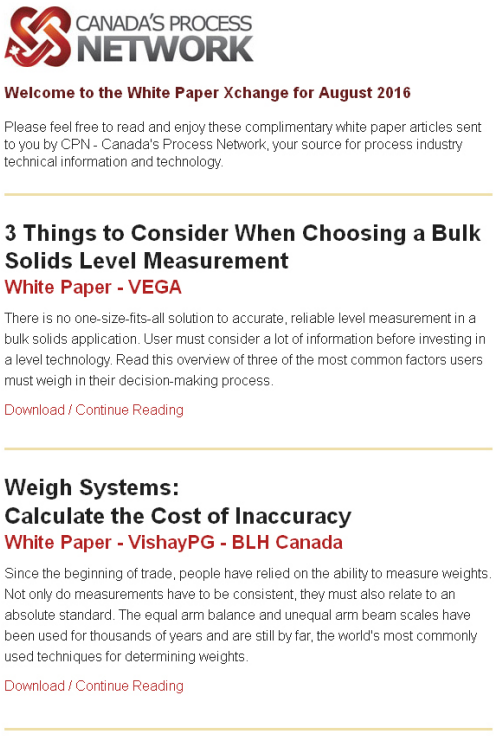
The CPN White Paper XChange

Canada's Process Network, a Business Unit of Swan Erickson Publishing Inc., publishers of IPP&T and PROCESSWest Magazines, has developed a white paper exchange service, to deliver technical papers into the hands of engineers and other important personnel in Canada's processing industries.

Articles that deliver technical information are valuable informational and promotional tools for your company. Each year we receive many papers too long or too technical for publication in our magazines.

These white papers represent a valuable resource, and the **CPN White Paper XChange** service is a means of delivering this resource to Canadian process professionals in a timely and cost-effective manner.



CANADA'S PROCESS NETWORK

Welcome to the White Paper Xchange for August 2016

Please feel free to read and enjoy these complimentary white paper articles sent to you by CPN - Canada's Process Network, your source for process industry technical information and technology.

3 Things to Consider When Choosing a Bulk Solids Level Measurement
White Paper - VEGA

There is no one-size-fits-all solution to accurate, reliable level measurement in a bulk solids application. User must consider a lot of information before investing in a level technology. Read this overview of three of the most common factors users must weigh in their decision-making process.

Weigh Systems:
Calculate the Cost of Inaccuracy
White Paper - VishayPG - BLH Canada

Since the beginning of trade, people have relied on the ability to measure weights. Not only do measurements have to be consistent, they must also relate to an absolute standard. The equal arm balance and unequal arm beam scales have been used for thousands of years and are still by far, the world's most commonly used techniques for determining weights.

The CPN White Paper XChange generates interest in the Canadian processing and engineering communities for topical and up-to-date technical information .

The number of white papers in any one issue is limited.

The CPN White Paper XChange is emailed 12 times a year to approximately 25,000 recipients in processing industries across Canada.

Processing and distribution costs are as follows: Top spot is $675, and spots two and below are $575, on a first served basis.

Each spot consists of a 50-word introduction to the white paper and a link.

There is no advertising in the White Paper XChange.

For more information, or to reserve a spot in the next White Paper XChange, please contact:
